

CONVERD

a finch paper partner

The conVerd Board™ product portfolio provides a rigid environmentally sustainable and fully recyclable alternative for structured signage applications in the wide-format market.

conVerd Board™

(rigid media)

conVerd Board™ is a bright white, dimensionally stable, rigid print media that can be directly printed via flat bed digital UV, or used as a laminating board for offset or roll to roll printed signage. The product is designed for indoor and short-term outdoor point-of-purchase and signage applications.

conVerd Board™ is both Rainforest Alliance and FSC® certified. It incorporates 10% post-consumer waste to achieve maximum sustainability without sacrificing the print quality or surface characteristics required for critical POP applications.

The product is created to be moisture resistant and maintain superior dimensional stability during the typical changes in temperature and humidity that tend to affect other rigid media construction. conVerd Board™ has even achieved independent certification of recyclability through the North Carolina State University – School of Wood and Paper Science.

Applications

- Hanging signage
- Indoor POP
- Menu boards
- Standees
- End caps
- Aisle markers
- Window signage
- Trade show signage
- Displays
- Table tops
- Danglers

Easy to cut:

Cut custom shapes without the risk of crushed corners using blade, die or router cutting technologies.

Easy to install:

Use with grommets and frames or with an easel, double-face tape, Velcro or suction cups.

Technical Data

Thickness	Basis Weight (lb/MSF)	Flexural Rigidity (in/lb)	Edge Crush(in/lb)	Brightness
3mm / 1/8"	180	49 MD / 36 CD	170+	97+
4mm / 1/6"	235	70 MD / 50 CD	225+	97+
6mm / 1/4"	280	75 MD / 55 CD	200+	97+

Printer Compatability
